

alladin-IT GmbH and zafaco GmbH are awarded the contract for the BEREC Reference Measurement System

30.07.2018

BEREC (Body of European Regulators for Electronic Communications) assigned the contract for development, implementation and validation of the Net Neutrality (NN) **Reference Measurement System** in July.

After the implementation of the measurement system in 2019, alladin-IT and zafaco agreed on comprehensive support services for system architecture, software, maintenance and consulting until 2022.

The system enables the monitoring of the **Quality of Service (QoS) and Quality of Experience (QoE) of Internet Access Services (IAS)** as well as aspects of traffic management and serves as a reference for regulatory authorities. This decision is another important milestone in the harmonisation and standardisation of broadband testing in Europe.

alladin-IT GmbH, Vienna and zafaco GmbH, Ismaning are two service providers specialised for many years in measuring the service quality of mobile and fixed line broadband connections. They are experienced and proven partners of regulatory authorities and telecommunications providers throughout Europe.

We are pleased about this responsible task and are available for more detailed information anytime.

With kind regards

Sven Gschweidl
Managing Partner / CEO
alladin-IT GmbH

Christoph Sudhues
Founder and Managing Partner
zafaco GmbH
